Tube & Accessories

**REMANUFACTURED / REFURBISHED**

**2** yr.  
Warranty

All of our valves are hydrotested and calibrated on a high performance valve tester. Our remanufactured valves are disassembled, sandblasted, powder coated reassembled and tested. All of the soft parts, such as diaphragms, packing gaskets, and o-rings, are replaced. Gasket surfaces are then machined back to OEM specs.

All of our valves and a large majority of our instrumentation are now powder coated. Powder coating gives a long lasting finish that is resistant to corrosion and weather.
